

PRESS RELEASE

March 2025

Automated Layout Technology Granted a Fourth Patent on its Automated Marking Technology

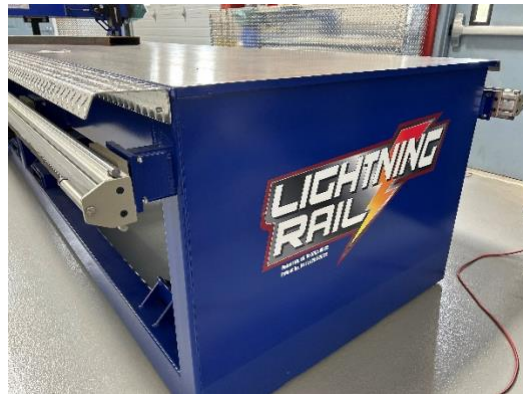

Hudson, NH — Automated Layout Technology announced that the United States Patent & Trademark Office has issued a fourth patent related to ALT's automated marking technology. On February 18, 2025, the Patent Office issued U.S. Patent No. 12,226,858, titled "Fabrication Layout Device and Method." This patent describes a novel assembly table with a marking tool.

Automated Layout Technology is a pioneer in the automated marking machine arena. ALT designed and developed the Lightning Rail®, which is the first automated marking machine created specifically for the layout of commercial handrails.

In recognition of the innovations made by ALT, the Patent Office has granted four patents related to ALT's fabrication layout devices and methods:

1. U.S. Patent No. 10,576,588, issued on March 3, 2020;
2. U.S. Patent No. 11,426,826, issued on August 30, 2022;
3. U.S. Patent No. 12,017,308, issued on June 25, 2024; and
4. U.S. Patent No. 12,226,858, issued on February 18, 2025

Automated Layout Technology will continue to innovate in this space and pursue patent protection for its novel inventions.

###

Automated Layout Technology, LLC is the maker of the Lightning Rail—the first automated marking machine created specifically for the layout of commercial handrails and stair stringers. The Lightning Rail quickly and accurately prints an entire handrail in minutes, cutting fabrication time by more than 50%.
